PROJECTS

Clinic

We created a website for the Clinic with the team. It contains information about Doctors and more results, news.

Nova Arcade

An Online Game Store built with ASP.NET Core MVC allows gamers to purchase and manage their games. Developers can add new games and perform CRUD (Create, Read, Update, Delete) operations through the dashboard. The project also incorporates the CQRS pattern for separating read and write operations.

BookStore

I contributed to Bookstore MVC project

Job Bot

We've built a resume or job posting bot. Using this bot, you can find a teacher, apprentice, partner or create a resume.

PROFILE

I'm an enthusiastic and hardworking Junior .NET Full Stack Developer who loves creating new and cool solutions. I know my way around .NET technologies and enjoy working on both the front and back ends of projects. I'm super excited to bring my skills to the table and learn from the pros in this field!
